

Provider Connect

Better Tools. Better Outcomes.

A centralized solution for supervision agencies and service providers that includes provider referrals, reporting, and case management.

- » Extends FieldWare's supervision case management beyond the agency for inclusion of approved treatment and service providers.
- » Enables approved provider staff access to perform intakes, fill in status reports, log contact notes, and set outcomes.
- » Can be used for recurring treatment programs, one-time assessments, or random testing.
- » Includes easy-to-use, secure, and reliable paperless system with accountability checks and balances that improves the process for both corrections and treatment providers.
- » Workflow components are designed to streamline communications and minimize information flow gaps.
- » Two-hour training sessions can be provided to treatment providers via video conference or on-site group training sessions.
- » Training sessions include knowledge transfer about features and workflow components.

FieldWare.com

Streamline Outcomes

Enable officers to refer clients to a pool of providers who can acknowledge enrollment through their login.

Improve Accountability

To-do alerts monitor compliance issues and alert users about non-compliance situations.

Simplify and Share Reports

- » Share completed custom enrollment reports between officers and treatment providers.
- » Final program outcomes can be assigned for higher-level agency analysis reporting.

Increase Flexibility

Set recurring treatment program alerts as flexible schedules enables users to complete reports as needed.
