

Workforce Mobile App

Connecting the Public Safety Workforce Anytime, Anywhere

The Workforce Mobile App provides registered users the convenience of Android or iOS mobile access to their FW | Workforce account. It's ideal for employees to easily manage their scheduling and administrative tasks while on the go.

When used with FW | Workforce, public safety users view their schedule and all scheduled events, such as time-off, overtime, training and court, using iOS or Android mobile devices.

Users can enter leave, overtime, and shift swap requests ... view and sign up for off-duty or special events ... or volunteer for ad hoc overtime assignments. They can opt in to receive agency-defined push notifications, such as scheduling changes, backfilling vacancies and more.

Court notifications can be received and acknowledged in real-time. What's more, officers can conveniently check into and out of court using the mobile app's geofencing capabilities.

Administrative tasks can be achieved, such as viewing agency announcements or routing their timesheets for approval.

Supervisors can quickly search for and call other employees to backfill vacancies. Employee time off, overtime and swap requests can be reviewed and responded to in real-time. Employee's time worked can be reviewed and authorized for payroll processing.

It's an ideal app that supports today's modern public safety personnel.

Authorized Control

- » Usage authorization controlled by authorized agency personnel
- » Enables agency to add, remove and/or return personnel to mobile usage
- » App downloaded via iTunes (IOS) and Google Play Station (Android)

Fast Mobile Data Returns with Reduced Security Risks

- » Uses Microsoft Azure Government Services with no personnel data saved in the cloud
- » Only housed data is a mobile user name, password, and agency code
- » All other data processed but not stored

Valuable Results for Employees, Supervisors, and Administrators

- » Real-time schedule viewing
- » Time-off, overtime, swaps, special events, timesheets, and court event self-services
- » Push notifications for scheduling changes, requests and more
- » Geofencing for court check in/out tracking
- » Supervisory approval management
- » Increased workforce oversight and management efficiencies for supervisors
- » Real-time updates viewed within FW | Workforce
